

## What is it?

Softswitch-as-a-Service is a cost-effective way to license SIP switching software. Instead of incurring hardware management and software maintenance expenses and substantial up-front investments, you can simply rent a fully maintained solution hosted in state-of-the-art data centers. With redundant hardware, guaranteed bandwidth and 24x7 monitoring you can focus on what's essential -- achieving your business goals.

## Is it for me?

If you are just starting a new VoIP business or willing to upgrade your existing VoIP platform to a professionally developed and supported solution without being charged arm and leg, then this is a right product for you.

## How can I succeed?

There are two essential components of success in this market: aggressive marketing and reliable technology stack behind the scenes. With Sippy Softswitch, you don't have to worry about the latter -- we've got you covered.

## Can I start lean?

You bet. You can start with our cheapest plan at US\$145 per month which includes 100 concurrent channels and all the features of the most expensive plan and upgrade when you're ready to move to the next level.

## How can I get one?

Please feel free to call us at 1-646-651-1110 or write an e-mail to sales@sippysoft.com.

## What kinds of business scenarios are supported?

Sippy Softswitch supports a wide range of business scenarios. From Vonage-like retail operations, calling cards and callback services to wholesale VoIP termination and hosted call shops. Sippy Softswitch has been built atop powerful multi-tier traffic reselling model that facilitates rapid growth of your revenues. We're regularly releasing new major and minor improvements to our system in order to support all scenarios our customers might want to use. We're also available for custom extensions development so that each and every customer can get exactly what is needed.

## What features does your software support?

Telephony-wise, we support all standard Class 5 features, including voicemail, call-waiting, message waiting indicator and three-way calling. Business-wise, we provide support for online payments using major payment processors so that you can accept all popular credit and debit cards; it also includes sales reporting and comprehensive plan & account management.

## Can I migrate my existing subscribers?

Absolutely. We have a lot of experience migrating subscribers from both commercial and open-source platforms. Our engineers will be able to assist you with the transition.

## Can I test before buying?

Please contact our sales team at sales@sippysoft.com and request a demo account or just buy the cheapest package and cancel it any time.

## Plans Schedule

Max. Capacity (channels)	Base Price Per Month	Estimated Number of Minutes per Month
4,000	US\$1,095	30,000,000
